

# EVERY EAR COUNTS.

## Choose Trico® Pro.

Deer pressure can quietly erode corn yields long before harvest. Browsing during early and mid-growth weakens plant development and cuts into your bottom line. When every acre matters, protecting corn isn't optional; it's essential.

**Trico Pro Deer Repellent** helps safeguard corn production during the most vulnerable growth windows. By deterring deer browsing before significant damage occurs, it preserves plant populations, protects yield potential, and supports consistent crop performance across your fields.

Designed for growers who want effective, responsible protection, Trico Pro delivers long-lasting defense with a natural, environmentally conscious formula. Easy to apply and built for real-world farming conditions, it allows you to focus on what matters most: **growing strong, productive corn.**

**Trico Pro's** long-lasting protection safeguards your corn fields against deer throughout the critical growing season.

## GUARD WHAT YOU GROW

## HOW IT WORKS

### Dual-Action Protection

Trico Pro creates a powerful invisible barrier.

### Taste-Based Repellent

Effectively deters deer before it takes a bite.

### Scent-Based Repellent

Reinforces avoidance and long-term behavior change.

### Seamless Integration

Mixes well with most tankmix partner products for easier handling and application.

## BENEFITS

### Protect Your Yield

Significantly reduce browsing, preserve your crop yield, and ensure you get the most from your harvest.

### Save Money

Incur fewer costs associated with replanting, pest control, and loss of income from reduced yields. Protection now means profit later.

### Support Your Land

Make the safe choice for your crops and the surrounding ecosystem by using natural ingredients and no harmful chemicals.

### Keep It Simple

Easy application that seamlessly integrates into your existing crop management plan.
