

YOUR SEEDLINGS DESERVE A FIGHTING CHANCE. Choose Trico® Pro.

The future of a successful timber stand begins with its smallest trees. In the months after planting, young seedlings work to establish roots, gain strength and begin the decades-long process of building the next stand of timber. But during this critical window, browsing and antler damage from deer, elk and moose can threaten survival and disrupt stand development. This makes early protection essential to the long-term health and value of the stand.

Trico Pro Deer Repellent helps protect seedlings when they're most vulnerable. Its dual-action formula targets the senses of **taste and smell** in deer, elk and moose, discouraging browsing and destructive behavior before it affects stand establishment.

By helping maintain higher seedling survival and more uniform growth, **Trico Pro** supports healthier forests and stronger long-term timber potential.

With long-lasting coverage from a single application and an easy-to-use liquid concentrate, **Trico Pro** offers practical protection across large forestry plantings without the labor and cost associated with physical barriers.

Protecting seedlings today helps reduce the risk of costly replanting tomorrow. By supporting strong stand establishment from the start, **Trico Pro helps forestry managers protect both their planting investment and the long-term value of the forest.**

GUARD WHAT YOU GROW

HOW IT WORKS

Dual-Action Protection

Trico Pro creates a powerful invisible barrier.

Taste-Based Repellent

Effectively deters deer, elk, and moose before it takes a bite.

Scent-Based Repellent

Reinforces avoidance and long-term behavior change.

BENEFITS

Protect Your Plants

Significantly reduce browsing, preserve your timber stand, and ensure you get the most from your investment.

Reduce Operational Costs

Minimize tree development losses, prevent replanting expenses, and dramatically reduce labor tied to deer damage.

Support Your Land

Make the safe choice for your trees and the surrounding ecosystem by using natural ingredients and no harmful chemicals.

Simplify Application

Integrate an easy-to-mix concentrate seamlessly into existing spray programs.
