

# PROTECT YOUR TURF AND ORNAMENTALS.

## Choose Trico® Pro.

Browsing deer can quickly undo the work that goes into maintaining high-quality turf and ornamentals. Golf courses, nurseries and landscapes are especially vulnerable to deer damage that impacts plant health and appearance.

**Trico Pro Deer Repellent** stops damage before it starts. Its dual-action formula targets the senses of **taste and smell** in deer, elk, and moose, naturally deterring them from feeding on ornamentals and turf.

The convenient liquid concentrate is **easy to apply, gentle on equipment**, and produces only a subtle odor for people while supporting consistent growth.

With Trico Pro, you can focus on maintaining **healthy ornamentals and pristine turf** without interference from intrusive wildlife.

## GUARD WHAT YOU GROW

## HOW IT WORKS

### Dual-Action Protection

Trico Pro creates a powerful invisible barrier.

### Taste-Based Repellent

Effectively deters deer, elk, and moose before it takes a bite.

### Scent-Based Repellent

Reinforces avoidance and long-term behavior change.

## BENEFITS

### Protect Your Plants

Significantly reduce browsing, preserve your turf quality and ornamentals, and ensure you get the most from your investment.

### Save Money

Incur fewer costs associated with pest control and damage mitigation. Protection now means profit later.

### Support Your Land

Make the safe choice for your plants and the surrounding ecosystem by using natural ingredients and no harmful chemicals.

### Keep It Simple

Easy application that seamlessly integrates into your existing pest management plan.
