

GIVE YOUR FARM THE GIFT THAT KEEPS ON GIVING.

Choose Trico® Pro.

For Christmas tree growers, every tree represents years of careful work. Seedlings are planted and shaped season after season until they become the centerpiece of a family's holiday tradition. But long before a tree is ready for the farm stand, deer, elk, and moose browsing and antler damage can threaten its shape, health and market value.

Trico Pro Deer Repellent helps protect Christmas trees by naturally deterring deer, elk, and moose. Its dual-action formula targets their senses of **taste and smell**, discouraging browsing and destructive behavior around developing trees.

By limiting deer access, **Trico Pro** helps preserve plant populations, protect yield potential and reduce costly replanting and labor – providing reliable protection throughout the tree's life.

Protecting trees during their growing years helps ensure that the ones you've spent seasons nurturing are the ones families will take home and gather around.

GUARD WHAT YOU GROW

HOW IT WORKS

Dual-Action Protection

Trico Pro creates a powerful invisible barrier.

Taste-Based Repellent

Effectively deters deer, elk, and moose before they take a bite.

Scent-Based Repellent

Reinforces avoidance and long-term behavior change.

BENEFITS

Protect Your Trees

Significantly reduce browsing, preserve your investment, and ensure you get the most from your harvest.

Reduce Operational Costs

Minimize tree development losses, prevent replanting expenses, and dramatically reduce labor tied to deer damage.

Support Sustainable Farming

Safeguard Christmas trees with a non-toxic, eco-friendly formula that is harmless to soil, handlers and equipment.

Simplify Application

Integrate an easy-to-mix concentrate seamlessly into existing spray programs across the farm.

Extend Field Protection

Maintain reliable defense through critical growth stages with consistent, properly timed reapplication.
