

Support your forest stand with *powerful protection* from wildlife.

Trico® Pro safeguards forestland and timber establishment from wildlife with a user-friendly, dual-action spray. By effectively repelling deer, elk, moose and rabbits, it protects your seedling investment without the time, effort and added expense of physical barriers.

Trico Pro uses natural ingredients to deter deer, elk and moose from browsing, antler rubbing and debarking damage. It targets the senses of taste and smell, producing long-lasting protection after a single application.

Unlike other wildlife repellents, Trico Pro produces a very subtle odor, which is non-irritating to humans but highly effective to the keen senses of animals. Its dual-action protection is delivered in a convenient, liquid concentrate that is easy to use and gentle on equipment.

With Trico Pro on your side, you can focus on what matters most – the long-term health and productivity of forestland. Contact your local Helena representative or authorized dealer for more information on Trico Pro.
